

Specific entry requirements for qualifications awarded by non-Italian education systems

The following list is destined to candidates who have obtained (or are about to obtain) qualifications awarded by non-Italian education systems. The information provided is a guiding tool regarding non-Italian qualifications and doesn't exempt in any way candidates from the submission of the full set of mandatory documents in order to be admitted and enrolled (see the [International Student Office](#) webpage for detailed information).

The database will be regularly updated, especially taking into consideration the peculiarities of the world education systems and their future developments.

The countries listed are those from which our University received the highest number of applications. Missing countries will be added in due time. **The absence of a country from the list doesn't mean that Sapienza won't accept students holding qualifications from that country.** For more information, you can ask the [International Student Office](#).

Preliminary notes:

- In case your title has been obtained in a foreign educational system through studies predominantly conducted in Italy, your qualification allows for the continuation of studies in Italian higher education only if it was received on the basis of at least the last two years of successful attendance in the foreign educational system, in accordance with the provisions in [Attachment 1](#) of the Italian Ministry of University and Research [Procedures for Entry, Residency and Enrolment of International Students and the Respective Recognition of Qualifications for Higher Education Courses in Italy](#) (from now on, Procedures for International Students).
- For recognition of qualification awarded by either foreign schools in Italy or Italian schools abroad please check CIMEA's [publication n. 135](#).
- If you hold a secondary education qualification obtained after 10 or 11 years of schooling in total and you wish to apply to a Bachelor's Degree Programme, please check compensatory measures in [Attachment 1](#) of the Italian Ministry of University and Research Procedures for International Students or apply for Sapienza's [Foundation Year](#).
- REGARDING TRANSNATIONAL EDUCATION (TNE):
As stated in UNESCO/Council of Europe Code of Good Practice in the Provision of Transnational Education, TNE includes "*all types of higher education study programmes, or sets of courses of study, or educational services (including those of distance education) in which the learners are located in a country different from the one where the awarding institution is based*". The mentioned Code specifies also that such programmes may belong to the educational system of a country different from the one in which they are offered or may be offered independently of any national system. In any case, TNE institutions must be accredited/recognized both in the country where they are based and in the country whose education system they refer to. In particular, in case applicants submit a foreign qualification obtained after studies mainly carried out in Italy, the recognition (even partial) of such a qualification is subject to the accreditation procedure of the institution operating in Italy, as established by Decree n. 214 of April 26, 2004 implementing Article VI.5 of the [Lisbon Convention](#).
